

PROJECT ADMINISTRATION

**Simplify your Project
Administration**

Tackle your Grey Rhino.
Start your digital transformation Today!

GREY RHINO 

A new era has started: Grey Rhino Project Administration

Discover the **ultimate logistics project administration** app designed to enhance your control over critical aspects like Line Items, Sales Invoices, Purchase Orders, and more. Simplify administrative tasks, streamline documents, and gain unmatched efficiency in managing your logistics projects. Unleash the power of seamless administration with our app today!

Keep IT Simple. When spreadsheets are no longer sufficient and micromanaging your business takes too

much of your time. We implement the right FIT for your organization.

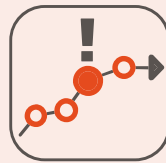

Our cloud based **Grey Rhino Project Administration module** allows you to effectively keep track of your projects. It's main features include seamless vendor invoice and sales invoice approval flows as well as powerful automations like template files and tariff books! Our game-changing dashboards provide easy tools to monitor your work in progress, outstanding and project performance on multiple levels.

**PROJECT
ADMINISTRATION**

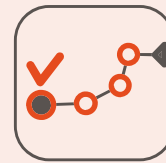

PROJECT ADMINISTRATION & INVOICING

Bundle your operational administration in a Project, allow you to organize all financial aspects of your projects. Use our customized print layouts to match your needs!

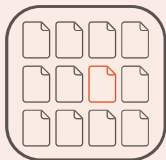

SALES INVOICE PROCESSING

Workflow Task based add-on is there for when you need to keep track of both physical and non-physical steps like internal and external approvals for your sales invoices. All configurable with your (client) processes.

VENDOR INVOICE & PURCHASE ORDER PROCESSING

Workflow Task based add-on for your Vendor Invoices allowing you to ensure that vendor invoices are operationally justified and align with what was expected. Step-by-step with full traceability and accountability.

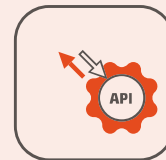

DOCUMENT TRACKER

In many projects, backups and documents are essential to keep track of. Our document tracker allows just that! Use our templates to ensure the completeness of documents for your project!

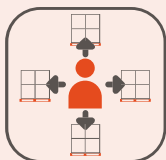

POWERFULL KPI & ANALYTICS

Define and track your KPI's and in depth reporting using Zoho Analytics. Transform data into insights and actions in minutes.

INTEGRATIONS

Our solution is fully integrated with a multitude of Zoho Products like Zoho CRM and Zoho Workdrive. We can integrate with many accounting systems like VISMA Accountview and Primavera.

MULTI COMPANY & CURRENCY

Our solution is made for companies with multiple organization administrations in mind. Each administration can have its own base currency whereas reporting can be unified to one!

SMART AUTOMATIONS

Do more with less is our principle! Our solution comes with many smart automations to aid in lowering of repetitive work: Tariff books and Templates Files are a few examples that save time and prevent mistakes!

CLOUD BASED

No need to worry about VPN's, client installations or server procurement. Our solution is web-based and scales automatically, regardless of size!
